## Casket and Outer Burial Container Price List

*The caskets listed below are either in our inventory or available for immediate delivery.*

*Any combustible casket or container may be used for cremation.*

*All of these caskets may be used for earth burial or entombment.*

*These prices are effective February 1, 2022. Prices are subject to change without notice.*

This booklet includes a selection of caskets, coffins, and alternative containers suitable for burial, cremation, entombment or transfer of deceased remains. While by no means the “entire” inventory of available choices, it represents a comprehensive selection of caskets in a variety of materials and styles available from manufacturers in North America, Europe and Asia.

Wooden caskets will vary in cost according to the species of wood, whether it is solid wood, composite or veneer and the style of interior, finish and ornamentation.

Metal caskets will vary according gauge of steel, the density of copper or bronze, whether it is gasketed or not and the style of interior.

Some may be customized, others are standardized. All can be used for burial and all but the metal caskets can be used for cremation. Hundreds of additional options in caskets and other funeral merchandise are available in catalogues and digital/large screen format.

While we are well qualified to discuss with you differences in manufacture, provenance, materials and costs, the decision about which casket should be used belongs entirely to the next of kin and immediate family. We hope that this casket price list assists in making good decisions.
