LYNCH & SONS

URN CATALOG

Burying an urn in a cemetery is a favored choice for many families, providing a permanent resting place and focal point where family and friends can visit and remember a loved one for generations to come.

Lynch & Sons is able to assist those who cremate with all suitable methods of further disposition including burial of ashes in a family lot, entombment in a columbarium, division and distribution of ashes, scattering of ashes, and other methods of disposition.

Scattering can be a meaningful choice but it is an irreversible decision and the use of land may change over time. In order to ensure an enduring place for memorialization, some families scatter only a portion of the remains and keep the rest for permanent placement.

Some families place the urn in a columbarium niche, providing a location where they can pay their respects.

Wise families take comfort in displaying an urn at home, providing a much-needed family and long-term custody of the remains.

*Please note that cemetery requirements for the interment of ashes in a columbarium or in the ground varies greatly from place to place. It is important that the cemetery is consulted regarding these requirements before selecting an urn style or size.

These prices are effective July 1, 2022. Prices are subject to change without notice.
